A PRICED AND CLASSIFIED BIBLIOGRAPHY, FOR EASY REFERENCE, OF THE MORE IMPORTANT ENGLISH AND AMERICAN PUBLICATIONS FOR THE FIVE YEARS ENDING DEC. 31, 1881

PREFACE.

The success which the various editions of "The Best Reading" have met with has encouraged its publishers to offer in a supplementary volume the titles of the leading books published during the five years since the last edition of that work was issued. This volume has therefore been compiled on the same general plan as its predecessor, following the same principles of inclusion and exclusion, using the same marks for rating, etc., so that familiarity with the former work will facilitate reference to this. It is, however, complete in itself, and can be used entirely independently of the first series.

The period covered is from July, 1876, to January, 1882. Some few books, however, issued before that time (and not included in the first series) have been inserted when their importance has seemed to make this desirable. New editions have, as a rule, been omitted; the exceptions being a few standard works of which the new editions seemed likely to become the leading ones. The cheap (paper) reprints have also been omitted, except where there was no other edition in the market. In addition to these, text-books, technical works, local publications, costly works, etc., have been excluded as in the first series.

The marks *a* (the best of the less expensive) and *b* (the best regardless of cost) indicate approximately the relative standing of the books under the various topics. It has not been possible to insert these in all cases, and in some instances (as under Religion) they have, for obvious reasons, been omitted. Under

fiction, in accordance with the plan of the former work, this marking has been carried a step further, and all the writers have been divided into three classes of "good," "better," "best," indicated by *c*, *b* and *a* respectively, while the relative importance of the several works of the more fruitful authors has been further indicated by the use of double or single asterisks.

It is of course needless to say that this list is not complete, and it is perhaps unnecessary to say, that the classification is not scientific. "The Best Reading" is planned as a working list for buyers of books, and not as a scientific bibliography. The books have been placed where it was thought they would be looked for, with references to help the searcher when in doubt. The compiler has endeavored to include every important American book, and a selection of the more important English ones, issued within this time. That he has succeeded in doing so he does not for one moment suppose. He can only hope that his sins of omission may not be many, or weigh too heavily against him.

MAY, 1882. LYNDS E. JONES.

[The following list, it is believed, embraces all the really important novels published within the period covered by this volume, and some few omitted from its predecessor. In making the selection the guiding rule has been to include all whose reception has been such as to promise a fair demand at least for the immediate future, unless there was some serious objection to their admission. The cheap reprints have, however, as a rule, been excluded, and only a portion of the works of some voluminous writers of merit have

A History of American Literature. By MOSES COIT TYLER, Professor of English Literature in the University of Michigan. Volumes I and II, comprising the period, 1607–1765. Large 8vo, about 700 pages, handsomely bound in cloth, extra, gilt top, $6.00; half calf, extra, ... $11 00

The History of American Literature, now offered to the public, is the first attempt ever made to give a systematic and critical account of the literary development of the American people. It is not a mere cyclopædia of literature, or a series of detached biographical sketches accompanied by literary extracts: but an analytic and sustained narrative of our literary history from the earliest English settlement in America down to the present time. The work is the result of original and independent studies prosecuted by the author for the past ten years, and gives an altogether new analysis of American literary forces and results during nearly three centuries. The present two volumes—a complete work in themselves—cover the whole field of our history during the colonial time.

"An important national work."—*New York Tribune.*

"The literary event of the decade."—*Hartford Courant.*

"A book more interesting than half the new novels."—*The Nation.*

"A work of great and permanent importance."—*New York Evening Post.*

"One of the most valuable publications of the century."—*Boston Post.*

"A book actually fascinating from beginning to end."—Prest. J. B. ANGELL.

"As the work stands, it may rightfully claim a place on the library table of every cultivated American."—*New York Times.*

"No work of similar scope and magnitude and erudition exists, or has been attempted in this country."—*New York Evangelist.*

"A unique and valuable work"—*Chicago Tribune.*

"A work which will rank with those of Sismondi, Ticknor, and Taine."—*New York Evening Express.*

"It is this philosophical character of the work which brings it not far distant from the works of Taine, of Buckle, and of Lecky."—*Buffalo Express.*

"One can hardly speak too strongly in praise of these conscientious, careful and successful volumes, which deserve to be studied alike by scholars and patriots."—*Rev. Henry Martyn Dexter, D.D.*

"But the plan of Professor Tyler's book is so vast and its execution so fearless, that no reader can expect or wish to agree with all its personal judgments. It is a book truly admirable, both in design and in general execution; the learning is great, the treatment wise, the style fresh and vigorous. Here and there occurs a phrase which a severer revision would perhaps exclude, but all such criticisms are trivial in view of so signal a success. Like Parkman, Professor Tyler may almost be said to have created, not merely his volumes, but their theme. Like Parkman, at any rate, he has taken a whole department of human history, rescued it from oblivion, and made it henceforward a matter of deep interest to every thinking mind."—T. W. HIGGINSON, in *The Nation.*

"The work betrays acute philosophical insight, a rare power of historical research, and a cultivated literary habit, which was perhaps no less essential than the two former conditions, to its successful accomplishment. The style of the author is marked by vigor, originality, comprehensiveness, and a curious instinct in the selection of words. In this latter respect, though not in the moulding of sentences, the reader may perhaps be reminded of the choice and fragrant vocabulary of Washington Irving, whose words alone often leave an exquisite odor like the perfume of sweet-briar and arbutus."—GEORGE RIPLEY, in the *Tribune.*

"Professor Moses Coit Tyler's 'History of American Literature,' of which the first two volumes have just been issued, will take rank at once as a book of lasting value, even though the author should advance no further than he has already done in the scheme of his work. We are not unmindful of the eminent historians this country has produced, when we express our opinion that his history is the best study of American historic material that has been written by an American. There has been manifestly no limit to the enthusiasm, conscientiousness and industry with which he has possessed himself of the entire body of the literature of which he treats, and at the same time he has displayed the qualities of a true literary artist in giving form, color and perspective to his work."—DAVID GRAY, in the *Buffalo Courier.*

By PARKE GODWIN.

New edition, revised and continued to August, 1877. Octavo, containing 1200 pages, cloth, $5.00; half morocco, $7.50.

The Publishers claim for this work that it presents an admirable combination of compactness and comprehensiveness. The previous editions have recommended themselves to the public favor, as well for the fulness of their lists of essential names, as for the accuracy of the material given. The present edition will, it is believed, be found still more satisfactory as to these points, and possesses for American readers the special advantage over similar English works, in the full proportion of space given to eminent Americao names.
